

# Program #1

Scanner ID program

# Customer: SC Enterprises

Dear Aleksandar,

We need a program which manages our scansystem. The following descriptions will help you to create a program.

# Scan ID's

**Input:** Unique-Numbers like

30501AC5003001P0221

30001AC5003002P0229

30011AC5003031P0228

30001AC5003100P0231

Etc.

**PROGRAM**

**Output:** Unique-Numbers like

AC5003001

AC5003002

AC5003031

AC5003100

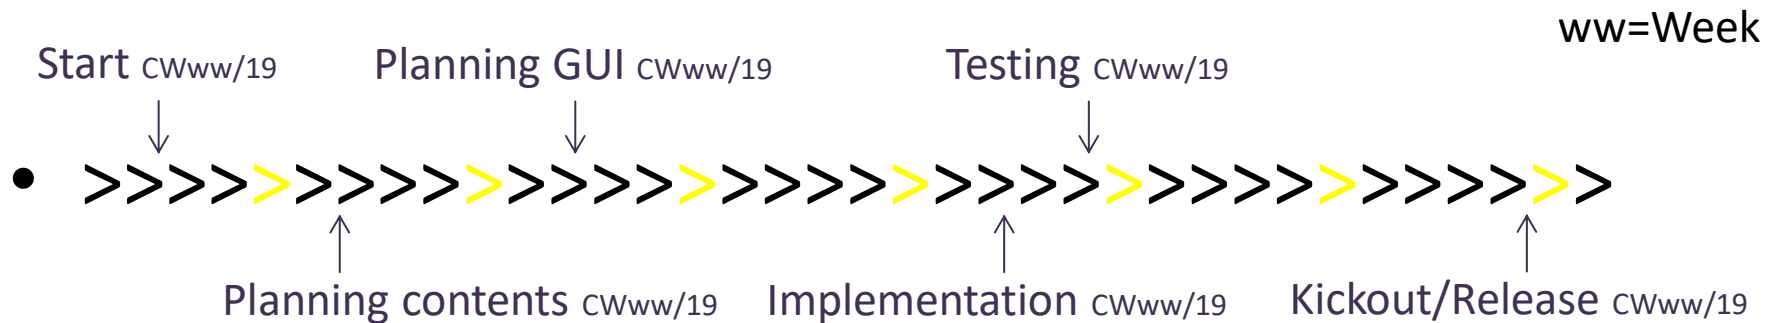

Etc.

# Conditions

- >The program should use a random generator to generate 25 Unique-Numbers like :  
30001AC5003100P0231
- >The program should use functions to extract only the part AC5003100
- >The program should save the old number and the new extract number in a List<string>
  - >and output the List in sorted sequence
- >Once in UI and once in Console Application for Windows Systems

# Descriptions

- Please create a description with a timeline (PPT, WORD, what you want) like **example:**

- Send the file via Skype to Davor Kreß before you start to code it

Thank you and enjoy
